

Sunil Kumar Sukesan

QA Automation Leader — GenAI & Test Evaluation

Test Automation Manager with **13 years'** experience in **QA leadership** and **automation framework design** across **web, mobile, and API platforms**, with growing specialization in **GenAI Test Evaluation** and **LLM Agent Assurance**. Hands-on with **GenAI-powered QA tooling** (RAG, MCP), **Salesforce data migration**, and **process automation** to improve delivery efficiency.

Work History

2025-01 -
Current

Test Manager

PwC Malaysia, Kuala Lumpur, Malaysia

- **Instrumented a LangChain-based agent** for evaluation using **DeepEval**, implementing **trace-level metrics** via CallbackHandler and **golden-dataset-driven test loops**; also built a **custom local HTML reporting tool** (zero external dependencies) for score visualization.
- **Led design and implementation** of scalable, **AI-enabled test automation frameworks** for **Salesforce-based applications** across **Web and API** testing layers, extending coverage to **Twilio/AWS Connect** across multiple client engagements.
- **Built AI-powered QA tooling** — test case generators, script generators, and defect classification accelerators using **RAG** and **MCP**, integrated with **Azure DevOps** — cutting manual effort by **80%**.
- **Built a WebDriverIO + TypeScript automation framework** from scratch with encrypted config management and failed-test rerun support, cutting **manual regression effort by 70%** and **flaky execution by 60%+**.
- **Supported BCRM-to-Salesforce data migration** through data validation, field mapping verification, and reconciliation testing.
- **Drove AI innovation initiatives** across the QA team, applying black-box test-design principles to **LLM agent evaluation**; represented the team at **PwC's AI Conference** showcasing GenAI-driven automation.

2024-09 - 2024-
11

Test Manager

Ernst And Young GDS, Chennai, India

- **Defined testing strategies and QA benchmarks** to ensure consistent quality standards, and **implemented automated test processes and tools** to improve efficiency.
- **Built automated scripts** to eliminate repetitive testing tasks and accelerate validation cycles, and **documented test procedures** to enhance reusability for future testing.

2023-06 - 2024-
09

Assistant Vice President - Core QA Automation

Citicorp Services India Pvt Ltd, Chennai, India

- **Maintained and enhanced the automation framework**, refactoring redundant, tightly coupled code, and **managed Jira tasks** for the team, reviewing code for framework integration.
- **Implemented Kafka stream handling** (static & dynamic) for event-driven validations, and **upgraded the E2E automation pack** to extract and validate **SWIFT messages** against enriched Kafka payloads.
- **Developed a Python utility** to convert XML data to Excel, and explored the **Python Robot Framework** to enable non-technical users to automate functional test cases.
- **Automated 20+ regression test journeys** during peak holiday load (Dec '23), and built a **Maven-based Java utility** to upload test

Accomplishments

- Earned the **Flex Award** at PwC Malaysia in 2025 for exemplifying core behaviors — *Evolve* and *Inspire* — in delivering innovative QA solutions.
- Received the **Gratitude Award** from Citicorp India Services in 2023 for consistent dedication and team support.
- Awarded **Star of the Month** at KPMG in March 2023 for exceptional contributions to test automation initiatives.
- Recognized with the **Barclays Stewardship Award** in 2020 for demonstrating ownership and long-term value creation.
- Recognized with the **Barclays Excellence Award** in both 2016

evidence to Zephyr with a single click, cutting manual effort by ~80%.

2022-12 - 2023-06

Test Automation - Assistant Manager

KPMG, Bengaluru, India

- **Created and maintained Azure CI/CD pipelines** for scalable automation execution, and integrated **Azure Key Vault** for secure credential management, ensuring **security and compliance** adherence.
- **Led two major projects end-to-end** from a QA standpoint, including **story estimation, task planning, and sprint management** within each PI, assigning tasks and monitoring team progress for timely delivery.
- **Cleared automation backlogs** and provided regular progress updates to stakeholders, while updating the test framework to support evolving requirements.

2021-09 - 2022-11

Test Automation Architect

Accenture (NatWest Client), Chennai, India

- **Updated the automation framework** to align with evolving business and technical requirements, and **developed custom Groovy functions** for dynamic test scenarios, including **response header capture** and **string comparisons**.
- **Tested newly developed API services**, validating integration with backend systems, and conducted **feasibility analysis** for new features in **core banking mobile applications**.
- **Automated manual process flows using Excel VBA**, improving team efficiency and reducing errors.
- **Delivered KT and training sessions** on the automation framework, onboarding new team members, and shared **weekly automation updates** with key stakeholders.

2018-08 - 2021-09

Automation Test Lead

Barclays Global Service Centre, Chennai, India

- **Implemented BDD** using **Cucumber with Selenium** and **Rest Assured**, integrating results into **JIRA**; enabled **distributed test execution** via **Docker** and **Selenium Grid**, wired into **Jenkins CI/CD**.
- **Led LCT automation efforts**, maintaining **cross-platform regression packs** for **iOS and Android**, collaborating with feature teams to close automation gaps and keep coverage current.
- **Set up cloud device labs** for remote app testing during lockdowns, supporting product owners and QA teams.
- **Automated tracking of deferred live defects** with weekly status reporting, and built an **NPS/complaints tracking dashboard** with single-click analytics updates.
- **Automated data visualization workflows using Python**, supporting the data adoption team.

2015-05 - 2018-08

Senior Test Analyst

Barclays Global Service Centre, Chennai

- **Transitioned automation ownership** from the Center of Excellence, **increasing automation coverage from 38 to 105 scenarios** across **Android and iOS**, including new scripts tailored for Android execution.
- **Refactored the framework** using the **Page Object Model (POM)** design pattern for scalability, and **migrated test reporting** from HTML to **Extent Reports** within **TestNG**.
- **Led daily Scrum calls** and drove QA/Dev collaboration, contributing to **test planning, regression updates, defect tracking, and TCM issuance**.
- **Prioritized key test scenarios for SRP migration** based on risk and impact, coordinating with the Barclays helpdesk to generate live test data across **five migration tranches**.

and 2018 for outstanding performance and delivery.

Education

2011

Bachelor of Engineering: Electronics And Communications Engineering

Sriram Engineering College, Aff By Anna University - Chennai

Skills

Gen AI

RAG

MCP

Machine Learning

Excel VBA

2012-12 - 2015-
05

Test Analyst

Barclays Global Service Centre (Contract Role), Chennai, India

- **Tested the full Smart Investor journey (150+ screens)** within a week under tight delivery timelines, alongside **cross-browser testing** for non-transactional pages.
- **Developed and implemented a defect tracking system**, improving **bug resolution time by 20%**, and built an **automated broken-link detection script** to improve content reliability.
- **Built 23+ Excel VBA macros** automating repetitive tasks, reducing manual effort across **QA and business teams**.
